The Rocket Summer

Now, let's take it back to January
An overflowin' heart, an empty wallet scene
Some wheels and a guitar, yeah, you think we're crazy
Drivin' on the ways of the hot and free and so we just hold on I remember rollin' through some state into a hotel
scene
With pennies to my name
I remember thinkin' I can't sleep but she's lovin' me
And so we just hold on, just hold on And here with you under these covers
I'll stay with you, there is no other
We share a name, we share a wonder
And on the roads ahead, we'll keep goin' further, yeah, yeah And all the struggles and honorable mentions
That pave our history we're all of my attention
It's just surroundin' you, I forget all that has used me
Bruised me, roamin' on the thrill 'Cause here with you under these covers
I'll stay with you there is no other
We share a name, we share a wonder
And on the roads ahead, we'll keep goin' further The rest is right, the rest is wrong
The rest will come when it comes along
The rest will find us, we belong here, oh, oh The rest is right, the rest is wrong
The rest will come when it comes along
The rest will find us, we belong here, oh, oh, oh, yeah And here with you under these covers
I'll stay with you, there is no other
We share a name, we share a wonder
And on the roads ahead, we'll keep goin' further And here with you under these covers
I'll stay with you, there is no other
We share a name, we share a wonder
And on the roads ahead, we'll keep goin' further The rest is right, the rest is wrong
The rest will come when it comes along
The rest will find us, we belong here
