

We're Gonna Move (Spankox Remix)

Elvis Presley

Well, there's a leak in this old building
Yes, there's a leak in this old building
Well, there's a leak in this old building
And we're gonna move to a better home We got no pane in this old window
We got no pane in this old window
We got no pane in this old window
We're gonna move to a better home Well, there's a hole in the roof where the rain pours in
A hole in the floor where it drops right out again Well, there's a leak in this old building
Well, there's a leak in this old building
Well, there's a leak in this old building
We're gonna move to a better home Well, there's a crack across the ceiling
Yes, there's a crack across the ceiling
Well, there's a crack across the ceiling
We're gonna find us a better home Well, we've gotta stove without a chimney
We've gotta stove without a chimney
What good's a stove without a chimney?
We're gonna move to a better home Pulling down window shades is no use at all
The kids and the neighbor can peep right through the wall Well, there's a leak in this old building
Well, there's a leak in this old building
Well, leak in this old building
We're gonna move to a better, move to a better
Move to a better home
