Bio-Mechanic

Front Line Assembly

Advisory - the following lyrics contain explicit language:

[Incomprehensible]
Keeping the brain going with micro shocksMelted faces
Fractured cells
Implanted memories
Syringe of hellCrippled mutants
Strapped with chains
Tortured users
Laughing in painEmpty vastness
You can't hear a sound
In space they float
Users unboundThe pulse it races
Chest is tight
A higher feeling
Censored with frightThe track marks on your spine, they say
Machines are humans
We're programmed that way
In God we trust, in God we trustThe track marks on your spine, they say
Machines are humans
We're programmed that way
In God we trust, in God we trustDisease
I believe in pain
Cruelty and infidelitySynthetic stimulant
Artificial plague
Demented erosion
Existence for a new wayThe track marks on your spine, they say
Machines are humans
We're programmed that way
In God we trust, in God we trustThe track marks on your spine, they say
Machines are humans
We're programmed that way
In God we trust, in God we trustEveryone [Incomprehensible] and corruptionIn God we trust
In God we trust
