

Take It All In (feat. REXX Life Raj)

Russ

Foot long joint
Case full of gin
Every night we black out just to take it all in
Every day we wake up just to do it all again
Every night we black out just to take it all in
Foot long joint
Case full of gin
Every night we black out just to take it all in
Every day we wake up just to do it all again
Every night we black out just to take it all in
I remember having no fans
Woah damn
Guess I done came a long way
I went from nothin'
To somethin'
Guess I done came a long way
I can't stop now
I'm always workin'
I know deep down
That I'm deserving
Of what I got
Of what I'll get
100 on my wrist
30 on my neck (woah)
Used to hang rappers on the wall
Now we hang plaques up (yup)
Your favorite rapper lookin' at your other favorite rapper
Like "damn I think he's really boutta lap us" (woah)
I spoke to the universe it spoke right back
And truthfully I don't even smoke like that
But I'm with the same people who can tell you where I came from
So I bought a half a pound for my day ones
Foot long joint
Case full of gin
Every night we black out just to take it all in
Every day we wake up just to do it all again
Every night we black out just to take it all in
Foot long joint
Case full of gin
Every night we black out just to take it all in

Every day we wake up just to do it all again
Every night we black out just to take it all in
Every night we black out just to take it all in
Niggas talk down they don't wanna see me win
I' been on the road
I' been touching souls
You' been riding waves
Fuck around and get exposed
Nobody put us on
I've just been putting in work like it's fall again
I'm try'na ball out
Couple barbies in my doll house
Sippin' hen' to they fall out
Bounce back
Bounce
I might just roll up an ounce
If you roll up to my crib then don't come without a
Foot long joint
Case full of gin
Every night we black out just to take it all in
Every day we wake up just to do it all again
Every night we black out just to take it all in
Foot long joint
Case full of gin
Every night we black out just to take it all in
Every day we wake up just to do it all again
Every night we black out just to take it all in
