

First Star I See Tonight

Dan Gibson's Solitudes

First star I see tonight. When we broke up - that would be pain
said you'd never see me again
thought you still cared - Every things right
make this wish come true tonight. First star I see tonight Tell her I love her, tell her I care
tell her true love through life I would share
shine down on love and you shine on me
tell her about our life's misery First star I see tonight. Why must it always be this way
your never mine through the day
but at night memories return
see her back - still her love I still yearn First star I see tonight. Tonight - Tonight - Tonight.
