The Moon and I

Steve Vai

There is a love affair between the Moon and I
We skate the Milky Way in a forever sky
And all the stars crash like waves beneath our feet
And time could never find us as we slip beneath Nova sheets.
Down below you command the oceans tides
As you spin alone in a prison of gravity
Magnetic soul casts a spell so enchanting
Behind my eyes I'm searching in my galaxy
Come to me
Show me how you glow
Well escape to the other side of space
Where forever and never and all thats unknown is known.
