

# Summer Kills

## Holy Moses

[music: Andy Klassen]

[words: Sabina Classen] Dreams of hope hides all our sins

Winter's changes where it all begins

A false belief, that's not fair

Nature's gift, why are they there I feel something I can't explain

It takes control and gives me pain

There are thoughts infesting my mind

Take a look and see what you find Summer kills - Summer kills - Summer kills Summer's heat cuts like a knife

Winter makes summer come alive

Firestorms tear the planet's soul

Human race near its final goal I feel something I can't explain

It takes control and gives me pain

There are thoughts infesting my mind

Take a look and see what you find I feel something I can't explain

It takes control and gives me pain

There are thoughts infesting my mind

Take a look and see what you find Summer kills - Summer kills - Summer kills Dreams of hope hides all our sins

Winter's changes where it all begins

A false belief, that's not fair

Nature's gift, why are they there
