

Happy As The Sun

Tyrone Wells

Whenever this world gets the best of me
And it all goes wrong
I count down the hours till the time we meet
And I move along
'Cause I know that when I see you I will be Happy as the sun, lighter than a feather
Walking on the clouds when we are together
Every day with you just keeps getting better
The world's as it should be, when are you here with me
Here with me Whenever you leave, my heart skips a beat
Like it knows you're gone
Unless you are here, I am incomplete
Like an undone song
Only you inspire the melody in me I'm...
Happy as the sun, lighter than a feather
Walking on the clouds when we are together
Every day with you just keeps getting better
The world's as it should be, when are you here How could I go wrong
When you are here with me
How could I be anything but smiling? I'm happy as the sun, lighter than a feather
Walking on the clouds when we are together
Every day with you just keeps getting better
The world's as it should be, when are you here with me The world's as it should be
When you are here, when you are here
When you are here with me
