

Stand

Candlebox

Hey you, is there something you've got on your mind?
Can you speak a bit louder?
Just wait, listen close to these words and you'll find
It gets harder to swallow their lies
Stay, all they ask is you follow them, fools
Yes, you've made it so far so you play
Bring your friends to our party
Recruit, it'll take you much further
Oh, this is your way
All your cunning destruction
No, we cannot stay
We'll say, fuck you conception
If I stood for you and I bled for you
Would you come and save me, yeah
If we took a chance, did it all again
Would you run away or stand?
So you prey on the loneliest cubs in this zoo
All the weak and unknowing
Just clay, you can mold and conform them the rules
We must break in bad habits
Oh, this is your way
All your cunning destruction
No, we cannot stay
We'll say, fuck you conception
If I stood for you and I bled for you
Would you come and save me, yeah
If we took a chance, did it all again
Would you run away or stand?
Stand up for who you are
Stand up if I am not here
Stand up for who you are
Stand up not run
Oh, if I stood for you and I bled for you
Would you come and save me, yeah
If we took a chance, did it all again
Would you run away or would you stand?
If I stood for you and I bled for you
Would you come and save me, yeah
If we took a chance and did it all again

Would you run away or would you stand?
Ooh yeah, would you stand?
Would you, would you, would you, would you
Would you, would you stand?
