Bacterial Surgery

Pestilence

Gathered and driven under their command
They lived in fear for their judgement
Penal servitude, pitiless manhandle
All taken under medical treatmentForced to take the depurative hypodermic syringe
Prison of experience, the testing laboratory
Experimental undertaking among those who suffered
They didn't shrink back from insanityEncaged with fear, the prospective death
Pernicious times, malicious inclination
Enslaved minds penetrated with aversion
They were proned to insistant domination
Eradicate and waste lives for knowledge
For the occurence has remained reality
Progressive development cannot be restrained
No sympathy, the animosityBacterial surgery
Terrible science, their destiny
Weakening, unconsciousness
In response to insanityBacterial surgery
Experience mortality
Purposeful endeavour
Inventions tendencyUse what lives for humanity
The eagerness, resolution
Living for the results
Calculation of the expectation
Flood-light the indefensible creatures
Blinded in their eyes
Medicines too frightened to look at
Instead of improving knowledge he diesWe all have the right to live
Don't abuse it and take it awayImportant conscious jobbery
Acting irresponsible
Scientific desires, medical crime
Symptoms of bacteriology
