Kill The Lights

The-dream

Oh, well, I? ve seen you around all those dark corners
Oh, where the shattered glass shines like stars
Oh, where those boys will be girls and those girls will be for hire
I swear they? re all strung out on those boulevards
She said, just give me a chance to explain
She said, just give me a chance, give me a chance
She said, just give me a chance to explain
She said, just give me a chance, give me a chance
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights, yeah
Oh, with those curtains drawn, you know that she? s so pretty
Oh, from those years of living in her car
Oh, in her soul there? s a country but her body? s a city
Oh, where those freeways aren? t free at all
She said, just give me a chance to explain

She said, just give me a chance, give me a chance
She said, just give me a chance to explain
She said, just give me a chance, give me a chance
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights
And you, you can tell me what to do, you can tell me what to say
And you, you can tell me what to do, you can tell me what to say
You come on over, we? ll make it right
We? ll lay it down then we? ll kill the lights
