

The Bug (feat. MC Pokes) [Live]

Magnetic Man

Hunt in the garden of false opportunity
I am the bug in this global community
Ravage your conscience with total impunity
I am the bug in this global community
Seek and provoke degradation and lunacy
I am the bug in this global community
Go tell your new God to beware of my heresy
I am the bug in this global community When all of our minds collide
You will confide
Everyone stays inside Penniless golden rush
Government hush
Billions of souls in the crush Open the heavenly gates
Nobody waits
Nobody contemplates We are a cog in the wheel
Cut us a deal
What were we supposed to feel? (Not 100% sure on this line) Automate all of the fears
Scan our tears
We are my eyes and ears See how the lovers click
Totem to pick
Monitor sexual rhetoric Up in the swelling storm
You can be born
After we fill out the form Remotely feed my desire
Intimate liar
Take evolution higher Take evolution higher Hunt in the garden of false opportunity
I am the bug in this global community
Ravage your conscience with total impunity
I am the bug in this global community
Seek and provoke degradation and lunacy
I am the bug in this global community
Go tell your new God to beware of my heresy
I am the bug in this global community Sympathy caught en masse
Footage of blast
Triggers petition and cash Every iota retained
Hacked up and chained
Personal details ingrained Making immortal the ages
Who sort through the pages
Searching for vaudevilles and wages (not 100% sure on this line either) Blindly embrace the tsunami
New York to Malawi
Identity Kamikaze Take evolution higher Hunt in the garden of false opportunity

I am the bug in this global community
Ravage your conscience with total impunity
I am the bug in this global community
Seek and provoke degradation and lunacy
I am the bug in this global community
Go tell your new God to beware of my heresy
I am the bug in this global community
