Metrognome

Camel

Time on your hands you do it all the day
Shuffle your feet and turn on the news
To hear what they might sayThey made a machine and you found your device
They're lighting the fuse there's no need to worry
Your world will be alrightTime for a smoke a pint and a joke
You muddle on through
Silently screaming, "What can I do?Till time trips you out looking about
Blows you away high as a kite
On a windy day
