

Throw It All Away

The Blackout

Try talking to you
While you do, while you do
I swap places with you
Just to see things through
Just sing me the tune and you'll see
I'll keep it here for you
I'll wait for your cue
You wrote down all the words
Black and white in a row
Just keepin' it so
Yeah, you know how it goes
No plans for a change
Nothing strange, no, not today, no way
Now, sing me the tune
Cash it in and throw it all away
Never needed any of it anyway
So you twist and you turn
Uncomfortable fool, you'll never learn
But you can take a stand
Forget all about the plans, California roads
Side one, track two
On a record of you
Even stuck on a groove
That I don't wanna lose
Just play it again as a friend
It's your favorite worn in shoes
Now sing me the tune
Cash it in and throw it all away, yeah
Never needed any of it anyway
So you crash and you burn
Sometimes the road will twist and turn
Some of this, less of that
Forget all about the map, California road
Cash it in and throw it all away
Never needed any of it anyway
Cash it in and throw it all away, yeah
Never needed any of it anyway
Cash it in, let's throw it all away
Never needed any of it anyway

Cash it in, let's throw it all away
Never needed any of it anyway
