

# Abilene

## Great American String Band

Something's goin' on, I don't know what it is  
But my phone just rang and I didn't get no call  
No call, just waiting here  
Abilene, it's got a lot of what you don't need  
It's got lots of space, still nothing seems misplaced  
You've got a face, you are spacey  
You got to take it as it comes to you  
Don't need no act of contemplation  
Just keep it off your wasteful way for now  
It's not you who has got to change  
It's not your way at all, it's got to be you  
It's got to be you, the look in your eyes  
The feel of your body close to me  
It's got to be you

Who tells me the world would spin away without love  
You, reason, oh, reason for being once more together  
It's got to be you  
It's got to be you, the look in your eyes  
The feel of your body close to me  
It's got to be you

Who tells me the world would spin away without love  
You, reason, oh, reason for being once more together  
It's got to be you  
It's got to be you  
It's got to be you  
It's got to be you
