

# Fast Buck Freddie

## Jefferson Starship

He said, "Hold a dollar bill up to the mirror  
And I'll show you something funny  
It's only a fast buck, but  
It's so hard to make that kind of money" Now it's hard to get serious  
When the joker is laughing  
And by now the joker is wild It's hard to keep laughing  
When a rich man's reflection  
Looks like a gun that's gonna smile What's going on? I ask you  
What's going on? Can you see?  
What's going on? I ask you and  
Who's coming on? Is it you or me? Coming on while it's still soft and warm  
Burn it dry before the fiery storm  
Sing it now while you still have a song  
Grab on now while you're still feeling strong How long, how long would you like it?  
How long, how long will it be?  
How long, how long can we take it?  
How long before we take it back?  
You and me, think fast I was thinking that I should be singing along  
Think fast I think he's coming through  
Think fast, he thinks he's running you I was thinking that I should be singing along  
Think fast, he thinks he's coming in  
Think fast, I think he's wearing thin I was thinking that I should be singing along  
Think fast, he's taking all your time  
Think fast, you know he's out of line But who cares  
You know you can  
You will, you know you can Sing it now while you still  
Sing it now while you still  
Sing it now while you still have a song
