Love Is Out There

August Moon

Time and time again you find yourself alone
You can't control the things that happen to you
So you try to run and hide

Impossible, the name of love, you've given up
Too many times have you been tossed to the side
You've given up, you've given up, you can't take it anymore

Chorus:
But love is out there
Don't give it up, no no no no

Self reflection, look at yourself
You start thinking that maybe it's all of your fault
You've given up on faith and the ways that you trusted love

You promised yourself, to never again let anyone in
You're down for the count
You're too scared now to start all over

Chorus

I know love grows
I know love will find a home

Chorus
