

Mythology

VersaEmerge

I've looked right past the simple things
What have my eyes missed?
Stuck in a space where nothing seems to fit
You live a myth, obsessed with it Quiet as the sound
I'm always asking what it means
And now I can't stop twisting round and round I've grown into this
This myth with you I can't stop twisting around this story line
Distorting my insides
I won't forget, I'm drenched in it 'Cause I can't stop twisting around this story line
Tangled words were never mine
I won't forget, I'm lost in it Slowly bending backwards
'Til my days become misshaped
You deftly sway my thoughts with your fictitious ways Nothing in me works the same
You've got a lot to explain
Still I'm asking and still I can't stop twisting I've grown into this
Myth with you I can't stop twisting around this story line
Distorting my insides
I won't forget, I'm drenched in it 'Cause I can't stop twisting around this story line
Tangled words were never mine
I won't forget, I'm lost in it Knots and crosses, skews, I fold in two
With this road we take
I've lost all control of everything, especially me You've lost everything especially me
You bite my tongue, oh, now I'm alive I can't stop twisting around this story line
Distorting my insides
I won't forget, I'm drenched in it 'Cause I can't stop twisting around this story line
Tangled words were never mine
I won't forget, I'm lost in it
Oh, now I'm alive
