

# Breathe Later

## Abdominal

### Intro

Im not breathing today, have you ever gone without breathing at all

\*pshh\*

verse 1

you never heard an mc with  
the lung capacity of this one  
a-b-d-o-m-i-n-a-l

the breaths I take are just one inhalation  
which will last me four durations thats unheard of  
I could probably ride a single breath until the verse is up  
you know the saying don?t waste your breath  
thats my personal slogan  
physically slim but got lungs the size of hollywood hogans  
and no man could hope to stand toe to toe with ab  
when it comes to chest expansions  
they be tight like shacks I be roomy like mansions

\*pshh later pshhh I said later man\*

please excuse me as I rudely take a pause for oxygen  
but now im ready to resume my rhythmic style of talking  
and my exhalation takes the form of the freshest expression  
its so fresh if I ate shit I wouldn?t even need a breath mint  
with (direction or withouts???) to me thats all just irrelevant  
I come packed with more lung power than a bellowing elephant  
hella bent on developing my breath control greater  
spectators concerned for my health yell at me to breath  
but yo I tell em ill breath later

### Chorus

Ill breath later Ill breath later Ill breath later I tell em Ill breath later  
Ill breath later Ill breath later

### Verse 2

Whether you a thug or pimp or hustler knuckle head or pretty boy or gangster  
baller acid rapper oldschooler or underground backpacker  
whatever so called subcategory of hip hop you select

yo you gotta give respect to 48 bars of 5 breaths abdominal  
making (auction near see me???) by comparison  
the way alot of rappers be punching in is embarrassing  
If I can't do it live ima do with a studio  
ill probably hyperventilate but so be it cause thats my duty bro

\*pshh inhale these raps dont finish till I get out of breath\*

I pack alot of wind to the point that police are hesitant  
to give me breath tests cause they know when they say ab blow in to this  
here breathalyzer their about to lose their apparatus  
even if I only gently breath I always end up smashing it  
I got a contract with this wolf who called me on my cell phone  
saying he pay me decent money if I helped him blow this pigs brick house down  
cause he knew when I huff I come with more puffs then bags of taters  
I rap like if it was the last verse of my life Ill breath later

### Chorus

Ill breath later Ill breath later Ill breath later I tell em Ill breath later  
Ill breath later Ill breath later

### Verse 3

Heres the spot I need to start the third verse  
cause its time to finish  
right before I get into it  
could somebody please (call Kenneth???)  
send alert them to the fact that  
theres a cat attempting to rap 16 bars  
in one breath its a warm up lap  
iv been there done that  
and im not alone big up to lyrics  
born in that the verse ship  
but I never heard tell of a single breath  
16 bar verse yet  
thats uncharted territory that were about to step into  
fuck a compass navigating with the mic that I rap into  
crossed the line into bar 9  
we make it safe my lungs are fine  
plus remind you that we lay down twine  
incase you need to find  
your way back out but dont back out now  
cause we almost reached the summit  
altitude sickness sets in I feel your knuckles start to plummet  
Ill be frank at this point bar 13 but only running off fumes  
need to consume oxygen the opportunity will come soon

because 15 bars about ready flipped through the sands of time  
but what was once one breath for man but one giant breath for man kind  
ill breath now

\*pshh my last breath gonna kick up a rhyme till there aint none left this may be hard to belive and I end this jam  
with time to breath\*
