One More Last Kiss

Ivy

I'm not afraid to start over
It's just a feeling that we shared
They can't take that awayI'm not afraid to be lonely
It's just a question of how long
How long I have to waitSo one more last kiss like two prisoners
One more last kiss to hold on to
One more last kiss just to remember you
Before we fade away, before we fade awayI'm not here making excuses
But no apologies could change
The way this all will endWe're only just what we're made of
I'm only sorry that we can't
Have this chance againSo one more last kiss like two prisoners
One more last kiss to hold on to
One more last kiss just to remember you
Before we fade away, before we fade awaySo one more last kiss like two prisoners
One more last kiss to hold on to
One more last kiss just to remember you
Before we fade awayOne more last kiss like two prisoners
One more last kiss to hold on to
One more last kiss just to remember you
Before we fade away, before we fade away
