

Scary Kisses

Voice Of The Beehive

There's a mature trick to playing safely baby
People do it every day
You can see them living sensibly with lots of care
Lonely in a cautious way You be a love for me, I'll be a love for you
One and one before no long makes two
Let's stir things up a bit
Throw the pieces up to the sky Baby, I want scary kisses
I want hits and I want misses
I want hell and I want bliss
And all that stuff between it And you gave me safety
And the show time all that drove me crazy
I would rather run and fall then take no chance at all
Then take no chance at all I would rather sit here by myself
Then settle down with someone safe and sound
I kinda like a little trouble every now and then
Someone with enough to break ground You take a look for me, I'll take a look for you
We'll find it's not so bad it's just new
Let's stir things up a bit
Throw the pieces up to the sky Baby, I want scary kisses
I want hits and I want misses
I want hell and I want bliss
And all that stuff between it And you gave me safety
And the show time all that drove me crazy
I would rather run and fall then take no chance at all
Then take no chance at all And if we break or if we bruise
It won't be the worst of news
We will just get up again
Start over on the count of ten And if we scar or if we break
It will be our own mistake
Put it down to what we know
Then have another go And take another chance
And just begin again
Run your finger through the flame
And I will do the same Together we will fall
Together we will rise
Together we will do everything
But compromise Baby, I want scary kisses
I want hits and I want misses
I want hell and I want bliss

And all that stuff between it And you gave me safety
And the show time all that drove me crazy
I would rather run and fall then take no chance at all
Then take no chance at all And if we break or if we bruise
It won't be the worst of news
We will just get up again
Start over on the count of ten And if we scar or if we break
It will be our own mistake
Put it down to what we know
Then have another go Baby, I want scary kisses
I want hits and I want misses
I want hell and I want bliss
And all that stuff between it And you gave me safety
And the show time all that drove me crazy
I would rather run and fall then take no chance at all
Then take no chance at all
