

Angel Face

Stella Soleil

Angel, I imagine your body
It tingles me in the night
You are my obsession
And I want to get this right You lap me up for hours
Until it was light
And covered my body with flowers
And rushed me to delight And come on boy
Angel face
Wrap me up
I can't wait I remember the dress I was wearing
It hung loosely
It was a hot and sticky summer
And you tore it off of me And come on boy
Angel face
Wrap me up
I can't wait All the people will come
And people will go
He's the one lover
I can't let go All the people will come
And people will go
He's the one lover
Sent to me from above I have been gone for so long
But he's still around me
Life just goes on
It seems so wrong
How he still surrounds me And come on boy
Angel face
Wrap me up
I can't wait All the people will come
And people will go
He's the one lover
I can't let go All the people will come
And people will go
He's the one lover
Sent to me from above Angel, I imagine your body
Tangled up with mine
