## **Angel Face**

## **Stella Soleil**

Angel, I imagine your body

It tingles me in the night

You are my obsession

And I want to get this rightYou lap me up for hours

Until it was light

And covered my body with flowers

And rushed me to delightAnd come on boy

Angel face

Wrap me up

I can't waitI remember the dress I was wearing

It hung loosely

It was a hot and sticky summer

And you tore it off of meAnd come on boy

Angel face

Wrap me up

I can't waitAll the people will come

And people will go

He's the one lover

I can't let goAll the people will come

And people will go

He's the one lover

Sent to me from aboveI have been gone for so long

But he's still around me

Life just goes on

Its seems so wrong

How he still surrounds meAnd come on boy

Angel face

Wrap me up

I can't waitAll the people will come

And people will go

He's the one lover

I can't let goAll the people will come

And people will go

He's the one lover

Sent to me from aboveAngel, I imagine your body

Tangled up with mine
