

Recover

[Xplor](#)

Your face in the night, slowly drifting away
Alone in the night, it's harder now to breath You won't love me still
You won't love me still
You won't love me still
You won't love me still If I ever recover
If I ever recover
If I ever recover
If I ever recover When tears on the floor, they echo love for you
The moment you go, I can't breathe anymore You won't love me still
You won't love me still
You won't love me still
You won't love me still If I ever recover
If I ever recover
If I ever recover
If I ever recover
If I ever recover (you won't love me still)
If I ever recover
(you won't love me still)
If I ever recover
(you won't love me still)
if I ever recover
(you won't love me still)
