

# Lobotomy

## Sepultura

I've seen you fighting through the time  
I've followed your steps full of pain  
Unnamed hero that's challenged the human egoVictim of cowardice  
Of strong manipulation  
A system that was made to lie and to deceiveScreams of agony  
Satisfy the proud  
But these screams still echo inside the conscienceContradiction, aggression, desolation, illusionNonconformity  
takes my mind  
Too much injustice to forget so fastMy disgust is greater than my compassion  
Feel the pain upon your final hourSelf-blame can't hurt me  
Eye for an eye  
You receive your just rewardNow I'll live my life with indifference  
I've tortured without remorse  
I've slaughtered without fearBrain killing brain  
Brain killing brain  
Brain killing brain  
Brain killing brain
