The Vision

Nostradameus

Watching over misty heavens
Great landscape passes by
Feeling blood adrenalized, that's running
through my veins
As the first of lightning cracks out
My heart's pounding soon we'll see
Listen careful to my words and you will be
preparedThere will be a giant battle
Mountains of bodies, blood sheds around
Help is wanted by the full moonSee across the hills
The hope is near
The prophets are hereThrough shredded landscapes we've come
To bring you hope and help
The future is our words
Our truth is all you need
You see it's breaking through now
Armageddon is here
Behold this eras end
Our prophecy's fulfilledBirds of omen hoovers around
By reign of evil we'll stand strong
Self destuction is ther fall
the enemy is fought
Thanks to blessed foretell we won
Brothers of arms and sacred blood
Maybe we can build up this world after it's
destoyedSee across the hills
The hope is near
The prophets are hereThrough shredded landscapes we've come
To bring you hope and help
The future is our words
Our truth is all you need...Through shredded landscapes we've come...
Through shredded landscapes we've come...
