Oceans

Roses Are Red

Under this city
You'd find what used to be my dreams
When you rise over the skyline
It makes a mess of everythingAnd to this day, I wonder
What it's like to be the biggest star up in your skyI found in you
Intention to model myself into your world
Determine through
A smile from you, attention to everythingSo take me, take me anywhere
Breathe a word and disappear
To find you wandering up with the angels
Take me anywhere, anywhere so far from here, so far from hereUnder this city
I've seen a million shades of gray
The way you fell inward for shadows
Makes a mess of every dayAnd to this day, I wonder
What it's like to be the biggest star up in your skyI found in you
Intention to model myself into your world
Determine through
A smile from you, attention to everythingSo take me, take me anywhere
Breathe a word and disappear
To find you wandering up with the angels
Take me anywhere, anywhere so far from here, so far from hereTake me anywhere, so far from here
Take me anywhere, so far from here
Take me anywhere, so far from here
Take me anywhere, so far from hereSo take me, take me anywhere
Breathe a word and disappear
To find you wandering up with the angels
Take me anywhere, anywhere so far from here, so far from here
