

# Dance

## Little Texas

Take your time and watch your step  
You'd better get it right or you'll get left behind  
The way you're dancin' I can tell  
That someone else is on your mind You better dance with the one that brung ya  
You better hold on to the one that loves you  
You better turn around before we're through  
And dance with the one that brung you, you'd better dance Oh, that sparkle in your wanderin' eye  
Has struck you blind as far as I can see  
Take one step back and look again  
You're gonna leave with him or stay with me You better dance with the one that brung ya  
You better hold on to the one that loves you  
You better turn around before we're through  
And dance with the one that brung you, you'd better dance Well, now we've gone this long  
Don't let it slip through your hands Dance with the one that brung ya  
You better hold on to the one that loves you  
You better turn around before we're through  
And dance with the one that brung you You better dance with the one that brung ya  
You better hold on to the one that loves you  
You better turn around before we're through  
And dance with the one that brung you, you'd better dance, yeah
