Pain Killer

Gretchen Wilson

I've been pouring whiskey on your memory I cant seem to drown this hurt inside Bottom of the bottle leaves me empty I need something strong to ease my mindI need a pain killer Just one night of sleep Someone who will hold me close And get me over himAnd it'll taste bitter Stranger set me free I need a pain killer Before this pain kills meNever thought I'd have to love another Never been the kind to sleep around I wish it was a pill and not a lover Its gonna be so hard to swallow downI need a pain killer Just one night of sleep Someone who will hold me close And get me over himAnd it'll taste bitter Stranger set me free I need a pain killer Before this pain kills meAnd It'll taste bitter Stranger set me free I need a pain killer Before this pain kills meI need a pain killer Before this pain kills me
