History Lessens

Skyclad

Look what you get for following leaders,
who lead from the rear - where are they now?
What did we learn in history lessons?
How to sit quiet at the back of a class.
With so many things open to question,
it's too late to cry - there's no one to ask.
Life's an education - a multiple equation,
everybody finds their own solution in the end.
"To be or not to be" is a very lengthy question,
has somebody please got a sharpened pencil they can lend?
What did we learn in history lessons?
How to sit quiet at the back of a class.
With so many things open to question,
it's too late to cry - there's no one to ask.
Marching in time down a production line,
what did they teach you about life in a dole-queue?
The Law of Relativity - (life's relative misery)
the Law of Probability - (it's probably contrived)
Newton's Law of Gravity - (we face a grave reality)
The law that runs the jungle - (only the strong survive).
Look what you get for following leaders,
who lead form the rear - where are they now?
The path of least resistance - a bland text book existence,
don't expect to find the answers printed at the back.
the only sound advice that's carried me through life -
when the cards are stacked against you - play the joker in the pack.
What did we learn in history lessons?
How to sit quiet at the back of a class.
With so many things open to question,
it's too late to cry - there's no one to ask.
Marching in time down a production line,
what did they teach you about life in a dole-queue?
