

Just Try

Soulsavers

You came to me with open arms
To take away my fears
I took you in and you stayed a while
You lived with me right here You told me to believe in something
Something that's true
Like the mountains and the deep blue ocean
So much bigger than you You said: Just try
Come on, just try
Just try
Just try Just try I offered you a place to stay
Somewhere to rest your head
The Lord knows I need you here
There were something you said You'll have to believe in something
Something bigger than you
Like the great white open spaces
There's religions too She said: Just try
Come on, just try
Just try
Just try Just try You gave me more than I deserved
You gave me peace
You gave anything i loved in this world
And now I have to sleep Just let me sleep Just try
Just try
I have to sleep
Just try
Just try
