10 Miles Wide

Escape The Fate

Whoa, yeah
You say you're getting closer to that chance of suicide
Tearing at your throat, you won't let it die
Left me here for all these days
And ripped apart my pride
Take my place and look inside
I'm trying to find a place to hide, hide
Lost my faith but don't you cry
I got a hole inside and it is 10 miles wide, yeah, alright
Living on the coast cocktails and telling lies
Gotta fucking crush coming to life
You left me here for all these days
And ripped apart my pride
Take my place and look inside
I'm trying to find a place to hide, hide
Lost my faith but don't you cry
I got a hole inside and it is 10 miles wide
It's not to late, I'm close behind
I've gotta get inside your mind, mind

Lost my faith but don't you cry
I got a hole inside and it is 10 miles wide
Take me on, I'm feeling in the mood for something dangerous
I've found myself again
Take me on, I'm feeling in the mood for something dangerous
I've found myself again
Take my place and look inside
I'm trying to find a place to hide, hide
Lost my faith but don't you cry
I got a hole inside and it is 10 miles wide
Well, I lost myself and looked inside
It branded me for life
I can't help myself, it's mine to hide
I got a hole inside, it's feeling 10 miles
It's feeling 10 miles, it's feeling ten miles wide
10 miles wide
10 miles wide
10 miles wide
