Rain

Jon Heintz

Come sit with your angles
and give us some time
Forgive us this fragile frame of mind, its all right,
But its difficult changes for each in our turn
cause baby your angles never learned,
no we never learnedRain is gonna come down
Change is gonna come round.Were given these moments,
Were given this time,
We do what we must just to get by
Just to stay high and dry
And as sure as these blue skies theyre gonna turn gray
Youve given your angels all of your days
but you cant stayRain is gonna come down
Change is gonna come round.
