Completely

Azwel

I see the end of you and I
I used to care I used to try
To be the one to keep us alive
But you and I just can't survive
Through all your lies I now see you
I can't believe the things that you do
You think you'll be better off alone
You're asking me to somehow let go
Watch what you wish for
You know that you just might get it
Completely without me
What's in your head is on your hands
Completely without me
I overturned, I understand
Like an angel without wings
Or a song that never sings
Completely without me
Completely without me
It's hard to sleep in the bed you make
There's consequence for the path you take
But you don't care, you'll never learn
That most of us get what we deserve
I used to try to understand
But now I know it's all in your head
You think you'll be better off alone
Well, I am finally good to let go
Watch what you wish for
You know that you just might get it
Completely without me
What's in your head is on your hands
Completely without me
I overturned, I understand
Like an angel without wings
Or a song that never sings
Completely without me
Completely without me
Swallowing
(I can see you, I can see you)
Swallowing

(I can see, I can see)
You'll be completely without me
What's in your head is on your hands
Completely without me
I overturned, I understand
Like an angel without wings
Or a song that never sings
You'll be completely without me
Completely without me
You'll be completely without me
Completely without me, yeah
