

# Poison Was The Cure

## Megadeth

I miss the warm embrace I felt  
First time you touched me  
Secure and safe in open arms  
I should have known you'd crush me  
A snake, you were when we met  
I loved you anyway  
Pulling out your poisoned fangs  
The venom never goes away  
Serpent swims free in my blood  
Dragons sleeping in my veins  
Jekyll speaking with tongue  
Roach egg laying in my brain  
Stalked beneath your shadow

Sleepwalking to the gallows  
I'm the sun that beats your brow in  
Till I finally threw the towel in  
Never knowing if I'd wake up  
In a whirlpool, got redundant  
My brain was just some driftwood  
In a cesspool I became dead  
From a rock star to a desk fool  
Was my destiny someone said  
Life's a tide pool  
Taste the waters, life's abundant  
Taste me
