

The Principle of Evil Made Flesh

Cradle of Filth

From the primeval mass
Let precious chaos vent
Sacred flesh drenched in fornication
Beloved by Set
May the winds gather her together
From the secrets of men
After thousands of years of terrifying silence
She comes again(All Destroyer)The abolition of the yeshua begins...Shattered are the icons of the worthless
The Goddess scorned is a Valkyrie born
Scattered are the wings of the virulent holy
Leave their husks to be the prey of vultures and dogsWorld without end
Cherish the lissome wants of pernicious evil
Dusk in her eyes
Torn bloody weeping skies
Darkness will hasten to devour
And the weak will flee or dieHeil Vaskt, drinker of blood, dancer on flames, disposer of light, lover of darkness.
Shes holding an inquisition from the bandaged, feeble, watch.I slay the lamb in the fervour of thine
Abandonment unto Our Lady
With a quenchless thirst for the infinite
For Her that exists beyond all knowledgeStorming from tired centuries
Under the glare of a waxing death-moon
Terrible beauty of love severed
Rip the baby from the virginal wombThe blood of Jesus
Is the wine of the dead
And the drunken angels
Bleed with incestThe Liliot suckle on Her fruitful breasts
And yield the swords that sever and stain
There will be no act or passion wrought
That shall not be attributed to Her namesTo the name of Baphomet...
Artemis, Bastet, AstarteI yearn to thee who art darkness in thy rising
