

I Want To Drag You Around

Blondie

I want to drag you around
I want to drag you around
I can't be worried about everything you do
Nobody knows the places you get to
I want to drag you around
I'm gonna find you
Just look behind you
I want to drag you around
When you're not looking
Boy I'm closing in
I can't be worried about everything you do
How can I know the places you get to
The details they don't matter to me now
It's you and everything about you oh
And others scream and shout I need you no
Cause that's just not the way we go
Way we go
I can't be worried about everything you do
How can I know the places you get to
I want to drag you around
Knuckles flying
Boy give up your fighting
I want to drag you around
I'll keep repeating
You know I'll never stop
I want to drag you around, I want to drag you around, I want to drag you around...
I want to drag you around
I want to drag you around, I want to drag you around, I want to drag you around...
I want to drag you around
I want to drag you around, I want to drag you around, I want to drag you around...
I want to drag you around
I want to drag you around, I want to drag you around, I want to drag you around...
I want to drag you around
