

# The Abyss

## Bioshock 2

The future is predestined  
The writing's on the wall  
Can you see the telltale signs?  
The turning point has come  
    Here it comes  
    Suicide bombs exploding  
    As missiles crack the sky  
    Earthquakes and tsunamis  
    Signal the end of time  
    In the here  
        And the now  
        Feel the fear

It's all coming down  
The world is turning, turning inside out  
    The world is burning, it's burning on somehow  
        But it's broken... it's burning  
    Goin' up in flames!  
Can we change the path we're on  
    Somehow turn the tide  
    Smother the all-consuming fire  
Before the world collides  
    With the here  
        And the now  
        Feel the fear

All coming down  
The world is turning, turning inside out  
    The world is burning, it's burning on somehow  
        The world is turning, turning inside out  
    The world is burning, it's burning on somehow  
        But it's broken... it's burning  
    Goin' up in flames!  
Do you remember bluer skies  
    Happy days and simpler times  
    Seems not that long ago  
        But so far away  
    Will it ever be the same again?  
    I don't think so'  
Cause it's here  
    And it's now  
    Feel the fear

All coming down  
The world is turning, turning inside out  
    The world is burning, it's burning on somehow  
        But it's broken... it's burning  
    Goin' up in flames  
        Up in flames
