

Society

Pennywise

Society
We all know there's something wrong and we know it all along
Sincerity
You may think there's no one else till they put you on a shelf Society
Pay your taxes stand in line help them plan for your demise
Society
Crush the weak to get your share 'cause nobody's playing fair
And no one cares How long you pray makes no difference today
When your society devices how you'll pay
When finding the truth makes no difference to you
Anyway you look at it you're gone get screwed
You loose Society
No one here can get along 'cause our history's too long
Sincerity
Think you're going with the flow but you never really know Society
To all the leaders it's a game and it's making you insane
Society
Data patterns are supplied proof tap back up all the lies
We're hardly alive How long you pray makes no difference today
When your society devices how you'll pay
When finding the truth makes no difference to you
Anyway you look at it you're gone get screwed
You loose Society
We all know there's something wrong and we know it all along
Sincerity
You may think there's no one else till they put you on a shelf Society
Think you're going with the flow but you never really know
Society
We all know there's something wrong and we know it all along Society
Society
Society
Society
