

# Clue

## Indra Lesmana

Do you have a clue? You don't have a clueI've seen you talking with your friends, friends

Clever young jokes in a world that never ends, ends

All the stars in the sky, just crossed your eyes

All the blood to your brain is in vain, is in vainWalking up the steps with the lies behind your lips

All your stupid friends love you for your mind

I've seen you, perfectly designed, don't make me smile

Don't make me smile, all you thoughts are perfectly unkindDon't make me smile, all the stars in the sky

Just crossed your eyes, all the blood to your brain

Is in vain, is in vainDon't make me smile, don't make me smile

All the stars in the sky just crossed your eyes

All the blood to your brain is in vain, is in vain
