

The Wolves

Cyrus Reynolds, Gregg Lehrman & Keeley Bumford

Lyrics: This world is slowing down, how can I fight it? how can I? listen when there's no sound, the wolves are out, yes, the wolves are out. Hold on to what you've found, days are deceiving, my head is spinning round, oh, I hear them now, yes, the wolves are out. I'm losing sight of our reality, satellites singing serenity, send out a signal, please remember me, send out a signal, come set me free. I'm losing sight of our reality, satellites singing serenity, send out a signal, please remember me, send out a signal, come set me free
