

# Honey for the Bears

## Television Personalities

I didn't come all this way to bring you down  
I didn't come all this way to make you frown  
I didn't come all this way to make fun of you  
    You know that's something I'd never do  
        When I'm with you I swear  
            You're like honey for the bears  
    I didn't come all this way to criticise  
    I didn't come all this way to empathise  
I didn't come all this way to make fun of you  
    When I'm with you I swear  
        You're like honey for the bears  
        And Honey gets all that wants  
        Honey gets all that she needs
