

Let It Go (Outro Version)

Capetown

So sit back and relax and just watch the show
Just let it go, just let it go
Though we wait for the verdict in the time we will know
Just where we'll go, just where we'll go You said you loved me so why don't you care?
Seems like you solved this so why aren't you here?
I'm so unnoticed out in the cold
I still like romance so leave me alone In this town all the children have gone out to war But what is it for, but
what is it for
All the lies they've been told bring them close to the edge
They fight in despair they fight in despair
You said you loved me so why don't you care?
Seems like you solved this so why aren't you here?
I'm so unnoticed out in the cold
I still like romance so leave me alone
