Infinity

Adam Brand

Just how far does the universe go
Does it ever end, you say you want to know
Just how high can you count
Before the numbers all runs outWho built the Pyramids
Do aliens exist
Where does God come from
One more phenomenon
But if you know how strong my love is
And your heart and mind can comprehend
Just how long I'm gonna feel like this
Then you'll know what infinity is
Then you'll knowThey say that time goes on and on
Even after we're long gone
And there's a black hole up in space
That pulls so strong, light can't escapeThey'll find the answers to all those mysteries
But they won't understand what's between you and meThen they'll know what love is
