

Animalistic

Calais

Why is your movement so far from stable?
You wear your label as read from a fable
Why's conversation so animalistic yet realistic and based on statistic? Before I start give me your attention and
hear me mention our love's intention
Before I start think about your action, your overreaction and tomorrow's fraction Phantom out in the night
Forgive we knew not of your sight Slow down and we can pick apart
We can slow our hearts and revert to the start
How dare we make a public scene as we yelled and screamed and got caught in between
Hold opinion and hold your ground
Pick up a sound as we go round and round
Go ahead I've not got much to lose so go ahead and choose I've got nothing to prove Before I start let's go miles
away oh I can't stay here for one more day
Before I start let's refresh our minds to promote our time and get back into line Phantom out in the night
Forgive we knew not of your sight Please now can you just hear me speak and place these words on hold
It's cold out here and I'm feeling weak, we've spun right out of my control Phantom out in the night
Forgive we knew not of your sight
