

Don't Think

Hollerado

I remember the time late at spring we went to the museum's floor

I said dinosaurs look sad, you said just stop thinking()

I wanna feel the claws of planets not exploding love

An elusive element on earth, a periodic just stop thinking(Bridge)

I just wanna know()

At the end of time and space

Who will remember the human race?

All those books yet all that pain

Who'll remember the fun we had()

Do you think Einstein had a parakeet or just reality as company

It's singing how and now, just stop thinking

()

Remember the time we flew by rubber bands off California

With sweaty hands and wished that we could just, just stop thinking(Bridge)

I just wanna know()

At the end of time and space

Who will remember the human race?

All those books yet all that pain

Who'll remember the fun we had()

At the end of space and time

Who'll remember human kind?

All that good and all that bad

Well become with the fun we had

()

With asteroids and outer space

The moon town block is my favorite place

Release the place to get more settled

Well I don't think about you're at homeMelting ice inspire the price

We have both form out all nightFortified, glory time

Slipped it through

Gallery got in reverse

LordWe were in cars, we'll have a race until

Just stop thinking

We were in cars, we'll have a race until

Just stop thinking

We were in cars, we'll have a race until

Just stop thinking

We were in cars, we'll have a race until

Just stop thinkingDriving yea, it's our territory

Just stop thinking
Driving yea, it's our territory
Just stop thinking
Driving yea, it's our territory
Just stop thinking
Driving yea, it's our territory, territory
