

Burn Out Your Flame

Ingram Hill

They're coming around just to give the news and
They say that it's done, better leave while you can.
But fallin apart never did much good
Well how would it feel when they're over you.

Chorus:

So when failure looks you in the eye
There's no where left to run and hide
All you've got is what's inside.
It never matters who you blame
You loose it and you feel the same
Don't let them burn out your flame.

Hopin that there's gonna be a new start
You're learnin that words won't get you too far
Wasn't too long and you were on your way
You wait anymore and it will be too late.

Chorus:

So when failure looks you in the eye
There's no where left to run and hide
All you've got is what's inside.
It never matters who you blame
You loose it and you feel the same
Don't let them burn out your flame.

Bridge

Failure starin in my eyes
There's no where left for me to hide
I'm scared I'm running out of time.

It never matters who you blame
You loose it and you feel the same
Don't let them burn out your flame.
