## Haujobb

eyes zoom in present this frozen monument of confusion of  
cruelty and harmony romantic sessions with virtual candelight  
censoring the day forget one's memory those apparent bargains  
start the suspension of virtual masturbation thoughts  
pushing, pounding gently within those ancient yet advanced  
feelings this delicate balance of human nature is disturbed a  
desperate quest for more forget one's memory those apparent  
bargains start the suspension of virtual masturbation  
resistance futile explorations arrange your thoughts your  
great peace of encoding is just illusion of parallel time  
cameras zoom out
