

# Come Back

## The Early November

Looking in your eyes  
Praising every moment because you're my only light  
Reading through stares at your passion that bears me now  
Shedding no little tears  
The silence scares us more than leaving couldCome back  
Please don't leave me now  
I'll be all that you need  
In life because I can't live without you and  
I know all that you need  
I can give you everything  
When you're so far you'll forget about meWaiting by your side  
Knowing every moment is closer to your flight  
Upset with the past, but it's all that holds us now  
Believing no lies, telling each other we'll be fine foreverCome back  
Please don't leave me now  
I'll be all that you need  
In life because I can't live without you and  
I know all that you need  
I can give you everything  
When you're so far you'll forget about meBut I'll wait  
I could never leave those beautiful eyes  
I know you're sorry  
I know what you must be going through  
And I feel sorry for youBut please don't leave me now (3x)
