# Now I Can Fly

## Kimberley Locke

I can still remember how I felt that day
Like the wind was taken out from under me
It sent me head first back down to earth
Looking up at all my pain and hurt
Just when I thought all my hope was gone
Felt you there right by my side
Promising I'd never fall again
And lift me up into the sky
Shattered memories and broken wings
Love had left me with wounded dreams
You came in my life and now I can fly
My heart was heavy, it weighed me down
I couldn't see it, the higher ground
You came in my life and now I can fly
There's something different in the air around me
I can't explain it but your lovin' set me free
Now my head is all up in the clouds
There ain't a thing that can bring me down
Just when I thought all my hope was gone
Felt you there right by my side
Promising I'd never fall again
And lift me up into the sky
Shattered memories and broken wings
Love had left me with wounded dreams
You came in my life and now I can fly
My heart was heavy, it weighed me down
I couldn't see it, the higher ground
You came in my life and now I can fly
When you're lying next to me
I see a future in your eyes
I took a chance on letting you in
And I was right, I told the past goodbye and now I can fly
Shattered memories and broken wings
Love had left me with wounded dreams
You came in my life and now I can fly
My heart was heavy, it weighed me down
I couldn't see it, the higher ground
You came in my life and now I can fly
Shattered memories and broken wings

Love had left me with wounded dreams
You came in my life and now I can fly
My heart was heavy, it weighed me down
I couldn't see it, the higher ground
You came in my life and now I can fly
